To ensure player skill, tactics and match flow is not affected by the introduction of high-tech modes, players also use the traditional method of manipulating the ball on pitch during gameplay. Complementing FIFA's true-to-life physics engine and gameplay improvements like goalkeepers, which now properly react to different ball sizes, is the new "Pace of Play" variable that responds to a player's workload and fitness levels. Using detailed motion-capture data, the computer-controlled opponent reacts appropriately based on their fatigue. "The combination of the full-body motion capture technology and the players' realistic actions on the pitch create a totally immersive experience," said FIFPro President Philippe Eullaffroy. "Thanks to all these innovations, Fifa 22 Serial Key will prove a real game-changer for players and coaches, providing them with a new, more authentic and exciting approach to the beautiful game." What's new in Fifa 22:

- **Tackle decision-making has been enhanced with new AI that reacts and adapts to real-life situations, offering more options for future skilled play. For example, when receiving a through ball, a player is able to choose whether to use his/her momentum to shoot from distance; turn in a more dangerous direction; be more static and create a situation where he/she can make a better option.**
- **FIFA Ultimate Team is also available through Xbox Game Pass.**
- **Smoothed touch controls, ball physics and visual improvements increase the player experience**

throughout the game.

- **New Game Vision*** is a new camera system that interprets the rules of the game in a view that is more natural and less repetitive.
- **HyperMotion Technology** is also available for **In-Game Ad-Hoc** together with game offers.
- **A new worldwide visualisation of the MatchDay details on the Spotlight screen, with information on all 22 players and the referee, plus individual attributes and contracts.**
- **Off-ball movements for all 11 players in the Tactical Free-Kick area, with different control animations depending on the distances from the ball.**
- **FIFA 22 introduces an updated right analogue stick system with a new wrapping system that allows faster, more natural turning.**
- **'Tackling Parade' is a new Exhale concept built into the right Stick, which offers players more control. When controlling your defensive style, it allows you to slow down and 'parade' the ball in front of players to confuse them.**
- **The new Defending Midfielder concept allows for more options to break down deep defences. Players can have more options and more variety in their tactical approach to the game without forcing them to adapt the rest of their team.**
- **Quick Likes feedback is now integrated into the mouse and triggers, so you don't have to be within the game and pause to like a goal.**

FIFA 22 is a football video game series published by Electronic Arts, and developed by EA Canada, which debuted in August 1992, and achieved commercial success.[8] The series has developed into the largest sports video game series globally with over 200 million registered users, and has been noted as one of the most recognized sports franchises. All games have received mixed to positive critical reception with reviewers commenting on the realism of the game and the improvement of the gameplay. The series has won numerous awards, including "Best Sports Game" at the 1996 Game Developers Choice Awards and "Best Sports Game of the Year" from GameSpot. EA's "FIFA" is an acronym for "Federation Internationale de Football Association" (International Federation of Association Football). The game features EA's officially licensed FIFA National Teams and Players, as well as other officially licensed licenses, including the UEFA. The game has featured several different game modes in its history, including the original gameplay modes of Franchise and Career Mode, and the game modes Ultimate Team, Seasons, and two spin-off modes, FIFA Street and FIFA 14. The game was licensed by the Interactive Sports Agreement in 1993 and the FIFA license was changed to Electronic Arts in 2000. EA have released several FIFA

video games: FIFA, FIFA 99, FIFA 2000, FIFA International Soccer (later released as FIFA Football 99 in Europe) and FIFA 99 Gold, FIFA International Soccer 99 Gold (2001 in Europe), FIFA International Soccer (2002 in Europe), FIFA 12 (2013), FIFA 18 (2018), FIFA 19 (2019), and FIFA 20 (2020). Gameplay in the FIFA series is aimed at being more realistic and close to the real football game, in comparison to its predecessors. EA Sports have maintained a high level of control over the game, which has largely discouraged illegal behaviours and practices such as diving and simulation. More emphasis is given to a player's athleticism and style of play, including tackling, and individual actions. The series has received numerous Game of the Year awards for its gameplay. FIFA 90 introduced a new style of play that emphasized more passing and individual actions, and introduced a new pre-match procedure, 3-D matchday & lineups cards, and graphics. The series' transition to the 3-D engine resulted in improved animations and lighting, and increased the number of players on the pitch at the same time. FIFA 16 was the first FIFA game to allow for more off-ball fouls, faster one-on-ones between defenders, and more
