19.03.2020. 0020.Q: Speeding up Wix Installer built on Visual Studio MSBuild I have a WIX project on Visual Studio that is getting very slow. The build can take up to 30 minutes to complete, because it builds both x86 and x64 native installer for all of the projects in the solution.

Since only one of the projects should be installed, I would like to have just one native installer build, with the different configurations built by the MSBuild commandline tool. Is there anyway of modifying the wix build file so that it will only build the x86 and x64 installer for selected project? A: I managed to solve my problem. WIX build manager auto generated 2 generated files, one for the x86 version and one for the x64 version.

So I modified the WIX build manager to exclude the x86 build from being generated and only generate the x64 build. So my work around is to run msbuild "C:\PathTo\OurSolution.sln" /target:Build /p:Configuration=x64 Q:

Resizable, variable-height

UITableViewCell I am having some trouble with my TableView. From the beginning, I am trying to change the Cell height dynamically. On iOS 5 everything works fine, the cell automatically resizes.

On iOS 6
